## Summary

Hi, I'm Churchill Daniel, a full-stack developer passionate about building innovative and efficient web applications. With expertise in React, Express, MongoDB, Postgresql and modern web technologies, I aim to create seamless user experiences and well structured backend systems

## Skills

- Languages: JavaScript, TypeScript, HTML, CSS
- Framework: Express, React, NestJs
- Databases/ORM's: MongoDB, PostgreSQL, Prisma, Redis
- Tools: Github, Docker, Postman
- Test: Jest
- Problem solving, Teamwork and Collaboration, Adaptability and Flexibility

## Experience

- **Backend Developer**, Melcom eX (Startup) - [Github Link](#) (ongoing)
  - Collaborating with developers to build and optimize backend infrastructure
  - Designed and Deployed Application programming interface (API)

## Projects

- ChatSpace  
Developed a real-time chat application featuring user authentication and message notifications for an enhanced chat experience.  
[Live Site](#)
- E-commerce API  
A RESTful e-commerce API for managing products, users, orders, and authentication using Node.js, TypeScript and test written with Jest  
[API URL](#)   [Github Repo](#)
- TaskHub  
Built a comprehensive task management system that enables users to create, edit, and track tasks, seamlessly deployed on Vercel.  
[Live Site](#)
- URL Shortener  
Created a URL shortening service that allows users to generate short URLs and track clicks with a simple user interface.  
[Live Site](#)
- Conversa  
Developed an interactive chatbot application designed to enhance user experience through natural language

processing. Implemented using React and integrated with Google Gemini API.

[Live Site](#)

- Trivio

Developed an interactive full stack quiz application with category and difficulty filters, featuring a dynamic leaderboard for tracking high scores.
